The RPTC-001 transport case provides a secure environment for two RPM SSD/HDD magazines when removed from their RPC24 data storage system. This case is unbreakable, watertight, airtight, dustproof, chemical resistant and corrosion proof. It is made of Ultra High Impact structural copolymer that makes it extremely strong and durable. Its exclusive 1/4" (6.4 mm) neoprene o-ring and ABS latches seal perfectly and includes an automatic purge valve for quick equalization after changes in atmospheric pressure. The magazines fit into the high density foam for total subjection and protection against impact, vibration or shock.
